

Scent

Smart Toolbox for Engaging Citizens into a People-Centric Observation Web

Maria Krommyda, 24/10/17

H2020 Scent project

Can Citizen Science be an integral part of environmental decision making?

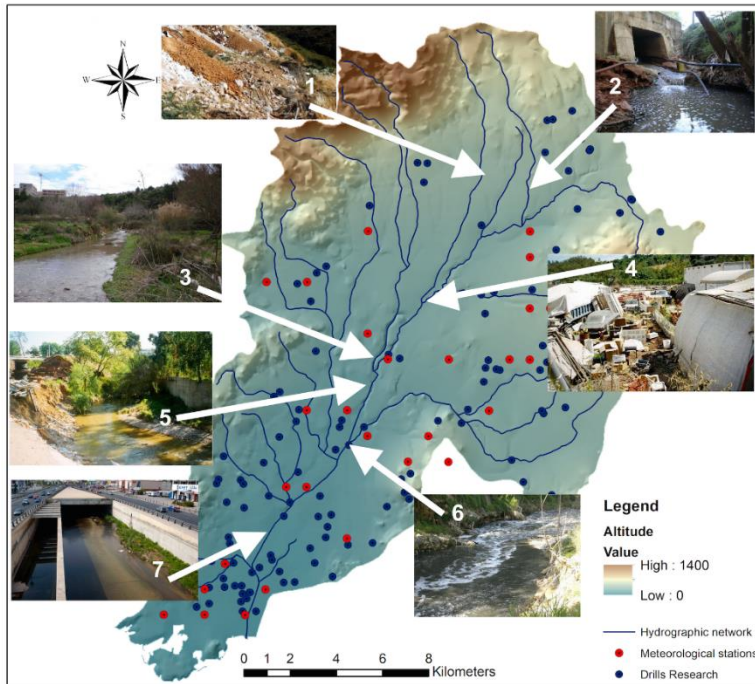

Scent will enable citizens to become the 'eyes' of policy makers by monitoring LC/LU changes and contributing to Flood monitoring & management.

Scent Large scale demonstrations

Where are we demonstrating Scent?

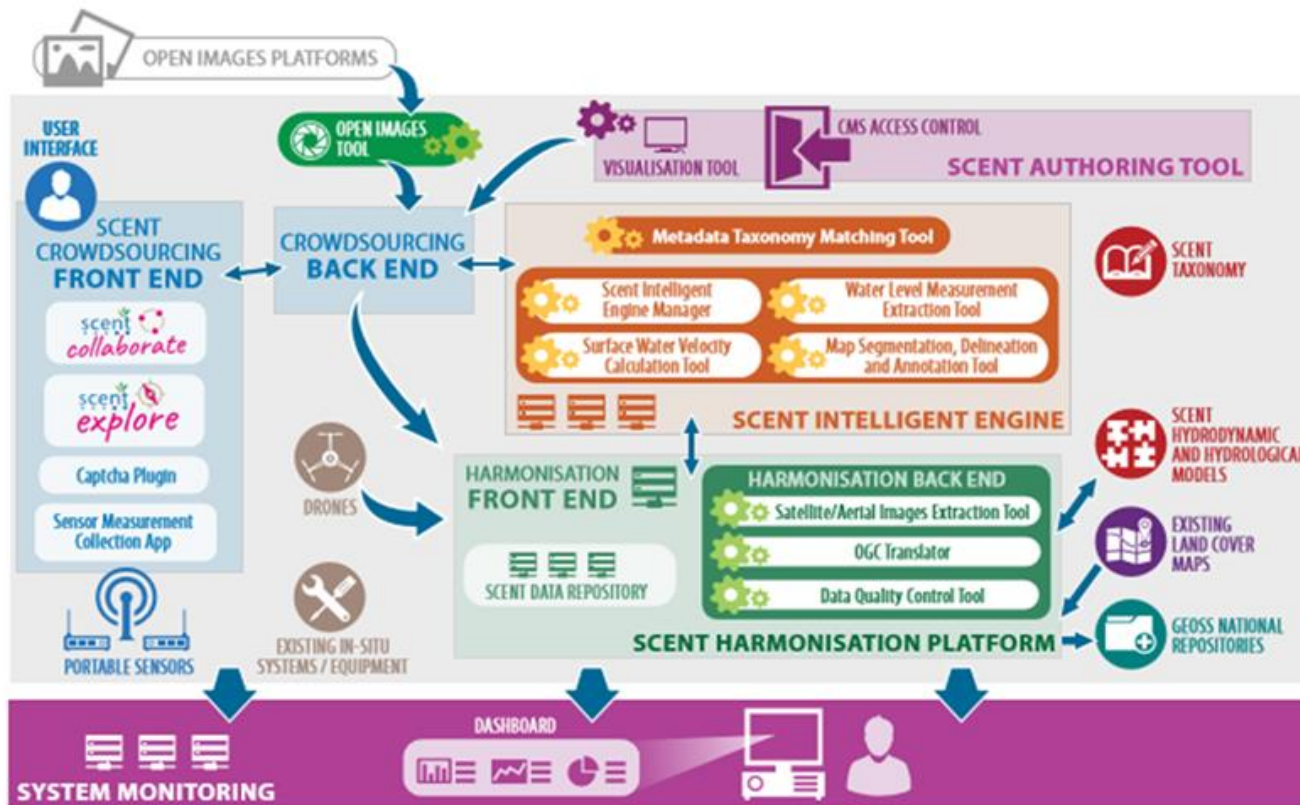

Urban area Kifisos river, Attica, Greece

Wetland of Danube Delta, Romania

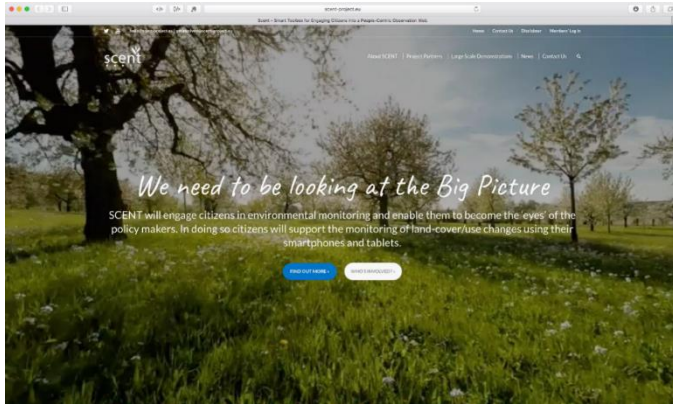

Scent toolbox

What are the technology enablers that make the Scent toolbox?

User Engagement

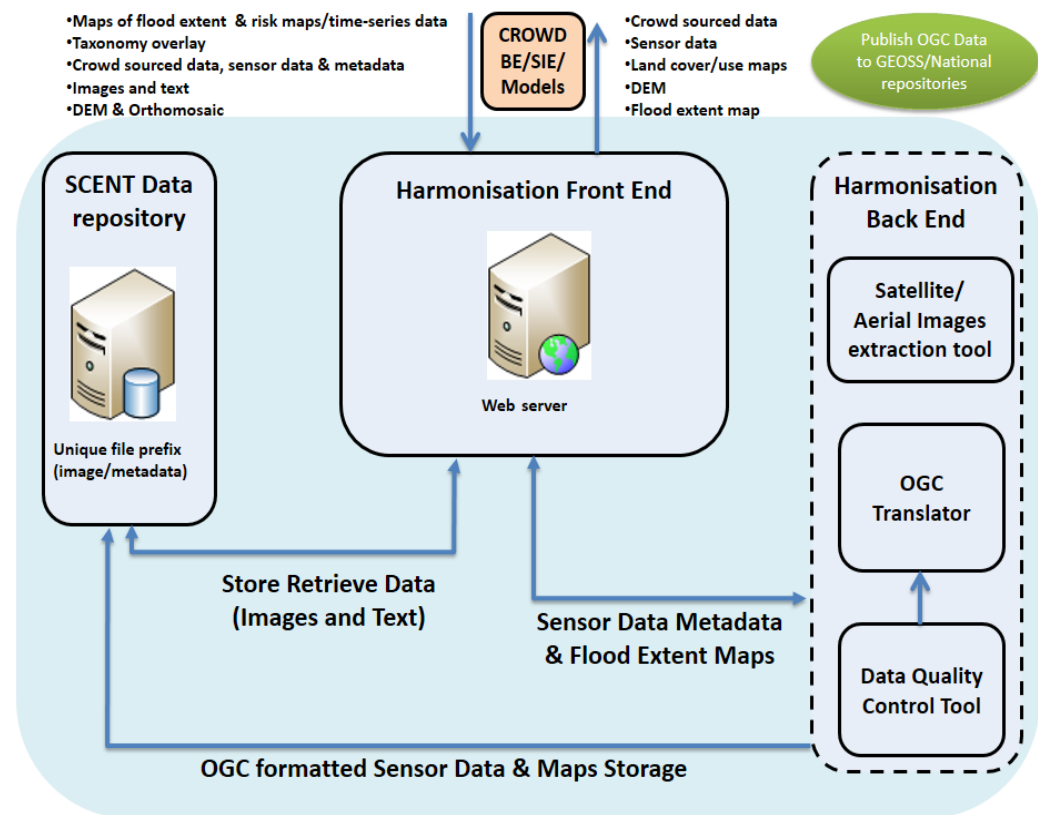

Why and how could you contribute to Scent campaigns?

Scent and GEOSS

How will Scent contribute to GEOSS?

Scent will develop an innovative harmonization platform that will store the image metadata, the LC/LU maps and the flood models as OGC compliant observations.

Thank You
